

ADVANCE DIRECTIVES

An "Advance Directive" is a general term that refers to your instructions about your medical care in the event you become unable to voice these instructions yourself. Each state regulates advance directives differently. STATE laws regarding Advanced Directives are found in Massachusetts Statutes chapters 111 §3 and 201D§1. In the State of Massachusetts, all patients have a right to name someone they know and trust to make healthcare decisions for them. If, for any reason and at any time, they become unable to make or communicate those decisions, the Health Care Proxy is a legal document used to make their wishes known. It is an important document, however, because it concerns not only the choices they make about their health care, but also the relationships they have with their physician, family, and others who may be involved with their care.

You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility's policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives with the patient (and/or patient's representative or surrogate) prior to the procedure being performed.

Advance Directives will not be honored within the center. In the event of a life-threatening event, emergency medical procedures will be implemented. Patients will be stabilized and transferred to a hospital where the decision to continue or terminate emergency measures can be made by the physician and family.

If the patient or patient's representative wants their Advance Directives to be honored, the patient will be offered care at another facility that will comply with their wishes.

If you request, an official state Advance Directive Form will be provided to you.
